HELP!

Simplify Benefits Administration

CosbyIG is committed to delivering top ranked service and support to our employer-groups, their employees and their family members. It's our goal to ensure that our systems are simple and intuitive to use. By reducing the administrative work, you can focus on what's most important — your business.

Keeping current with changing tides in benefits administration is a challenge for any company. Fortunately, we can help. With BenefitMall EmployerFocus, online benefits management system, administrators can manage company benefits. Human Resources or CosbyIG can use the software to add or edit employee information, manage contributions and produce reports. Employees, in turn, are able to access their benefits and make any updates needed, including dependent information, and more.

FLEXIBLE PORTAL DESIGN lets you tailor your web page to display pertinent information.

INTEGRATION gives you access to real-time, accurate data syncs of employee demographics and benefits deductions with the potential for payroll integration, eliminating double entry data.

EMPLOYEE ONBOARDING gives your employees the ability to complete demographic information, I-9 forms, complete document review and document uploads. All within a secure self-service online module.

ENHANCED REPORTING makes it easy to customize and produce reports, including ACA compliance.

Exclusively For You — Your company, Your employees — Only from CosbyIG

A single-source online solution that provides you and your company with real-time access to the information needed to administer employee benefits.

- Maximizes efficiency by saving time, minimizing paperwork and expediting transactions
